-

# Get started

- Croch is your portal to the private and secured digital world
- We gain access to free social media use by giving up control of our personal data.
- Next gen assest
- Your data is your asset take control of it just as your property don't tade it off for free social media mailing servies surfing its way more value then this
- You are not a product

# Why we started

When I was chatting to my mother one day about purchasing a ticket, the first thing I saw when I opened my email was an advertisement for an airline. This was shocking. You may have had similar experiences, which served as the inspiration for Conch for those who do not regard themselves as Big Tech products ready to be sold to advertisers. (Users as a product)

# What we do

(Your data belongs to you )

We offer a platform for the community where users can access private networks to protect their privacy and take control of their data. Our platform gives users the tools they need to do this.

# How we do it

The Activity you do on the platform like (using mail, social media Etc..)Any activity you do all the data you Generate is Encrypted & then stored on the blockchain or you can store it on your system which only you can access with a key You are the owner of your Precious data with full autonomy

# How does it work

- When you join the community, you are granted access to all of the tools, services, events, portals, and other resources available to members.

# Vision

- The goal is to make everyone's access to the internet safe. We seek to empower people by preserving their right to privacy and digital independence through our community. We wish to diversify the community so that people can use our platform for the majority of things

# Email services

- End to end encrypted
- Emails are more safe since they are encrypted, making them visible only to the recipient. Not even conch can view an email. You can store the encrypted data on a blockchain or on your own computer; in either instance, you retain complete ownership of the data and are free to do whatever you want with it.

# Social platform

- A free social media site without trackers, advertiser, or surveillance allows you to share your opinions without any restraints. Find and discuss ideas with others who share your interests.

# Safe browser

Protection and privacy Conch Browser makes browsing smooth and safe because there is no tracking, cross-site cookies, and advertisements are automatically banned.

# Community forum

We think that in order to actually construct a community that has an impact, there needs to be physical engagement between the members, where they can connect, work, talk, and share experiences.

# Manage money

A fair financial system allows members to lend money, own digital assets, govern your money, transmit and receive money, borrow money, lend and earn interest.

# Stand

- We support people's right to privacy, data ownership, and digital independence. People are not seen by us as commodities to be sold to advertisements. Because we think that individuals have bodies and that true connection requires actual contact, we appreciate your individuality and a community where people are truly connected both online and offline.
